Summary

Backend and AI-focused Software Engineering undergraduate with hands-on experience building scalable web applications and machine learning systems. Skilled in Spring Boot, Python, and system design with a strong focus on solving real-world problems.

Education

C.V. Raman Global University, Bhubaneswar

2023–2027

B.Tech in Software Engineering

Technical Skills

- **Languages:** Java, Python, C, SQL
- **Backend & Web:** Spring Boot, Flask, React, Next.js
- **Core CS:** DSA, OOP, DBMS, OS, CN
- **AI/ML:** Machine Learning, BERT, NetworkX, Tableau
- **Tools:** Git, VS Code, Jupyter Notebook

Projects

Full Stack Payment System (Razorpay Integration)

 GitHub

- Built a secure payment system using Spring Boot, React, and MySQL
- Integrated Razorpay for real-time transaction processing and verification
- Implemented payment status updates, partial payments, and transaction tracking

AI Chatbot (Ollama-based)

 GitHub

- Developed local AI chatbot using Python and Ollama
- Implemented real-time response handling and prompt optimization
- Designed modular architecture for offline AI usage

Research Paper Summarizer (AI-based)

 GitHub

- Developed an NLP-based system to generate structured summaries from research papers
- Utilized transformer models (BERT/LLMs) for contextual understanding
- Designed pipeline for PDF parsing, extraction, and summarization

Cafe Management System (QR Payments)

- Built full-stack system using Flask and React
- Designed REST APIs and secure payment validation
- Enabled real-time order and payment processing

Transformer-based Requirement Relation Extraction

 GitHub

- Fine-tuned BERT model for requirement analysis
- Modeled relationships using graph-based techniques
- Visualized outputs using NetworkX and PyVis

Experience

Central Tool Room & Training Centre

2025

Summer Research Intern

- Automated workflows using Python
- Built Tableau dashboards for decision-making
- Improved data pipeline efficiency
- Developed a machine learning-based crop yield prediction model using historical data and feature engineering to support data-driven agricultural insights

Coursework

Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning

Certifications

Palo Alto Networks Cybersecurity, Applied ML (NIT Kurukshetra), Data Analysis (MSME), Artificial Intelligence, Web Development
